

REIKI FOR ANIMALS

Reiki is a Japanese holistic energy healing technique that is gentle & non-invasive & can be used on animals. It helps animals to feel more relaxed & can reduce pain. Some animals fall asleep during Reiki. Reiki can be administered to animals who have Cancer, Diabetes, Arthritis as well as other ailments. It can also be used to help animals heal after surgery. Reiki can be used on animals feeling fear, anxiety, to comfort them & animals with emotional & behavioral issues. Animals respond intuitively to reiki.

For animals with Cancer it can help them to feel less pain, more relaxed & energetic. For animals who are sick Reiki is a powerful healing tool & works well alongside allopathic (western) medicine.

I have done Reiki on dogs with Cancer, Arthritis & Diabetes, as well as other ailments.

I have been doing Reiki for ten years & have animals, myself whom I regularly do Reiki on & Shadow, my cat loves it

I began doing Reiki on Tilak because he had severe Arthritis & afterwards he would bound off to chase a car in the distance.

One lady came to me recently to learn Reiki so she could do it on her dog who has Cancer. I taught her Reiki & did Reiki on her dog. Her vet thought Reiki was a great idea for Ralph.
